Subject: RE: TI - BCT Agenda, April 17 at 10AM, Tetra Tech Offices, Oakland

My apologies for my previous email. I hit send before I pasted the following into the body of the email:

To: Military Environmental Forum
Subject: [CPEO-MEF] RADIATION, REUSE: "Nuclear byproduct levels on Treasure Island [CA] higher than Navy disclosed"

Nuclear byproduct levels on Treasure Island higher than Navy disclosed

by Matt Smith and Katharine Mieszkowski
Center for Investigative Reports (CA)
April 12, 2013

Land slated for development on Treasure Island contains elevated concentrations of cesium-137, a byproduct of nuclear fission associated with an increased risk of cancer, according to an independent analysis commissioned by the Center for Investigative Reporting.

The findings, discovered through soil samples gathered by reporters and tested by two independent certified laboratories, appear to undermine some past statements by the U.S. Navy about the land's historic uses and the present condition of the island.

Results show cesium-137 levels up to three times that previously acknowledged by the Navy and at least 60 percent higher than the Navy's own thresholds for environmental safety.

"The questions raised by your testing should be fully vetted by the Navy," said Gary Butner, former chief of the radiologic health branch at the California Department of Public Health, who was a state watchdog for the Treasure Island cleanup until he retired in 2011. "I just don't have a sense there's a strong commitment to go and (clean) the site. They just don't want to spend any money there."

Subject: TI - BCT Agenda, April 17 at 10AM, Tetra Tech Offices, Oakland

Good Afternoon, TI BCT –

Attached is the agenda for next week's TI BCT meeting that will be held in the Tetra Tech Office, Oakland. The meeting will also have a webinar component so that the Navy RPMs can present their materials from San Diego. Webinar information will be sent out with the meeting materials next week.

See you next week!
